ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: SCREENING METHOD

(57) Abstract: The present invention relates to a method of screening a protein for involvement in cancer. The method involves the steps of: exposing the protein to a first viral oncoprotein; assaying for interaction of the protein and the first viral oncoprotein; exposing the protein to a second viral oncoprotein; and assaying for interaction of the protein and the second viral oncoprotein. Interaction of the protein with the viral oncoproteins indicates that the protein is involved in cancer.
